🔗 My Portfolio

EDUCATION

B. Tech

Parul University

2022 – 2026 | Vadodara, Gujarat

Computer Science and Engineering

CGPA - 7.02

Intermediate

Sri Chaitanya

2020 – 2022 | Vijaywada, A.P

MPC

913/1000

CERTIFICATES

Java

OneRoadMap | CERT-504099IF

Python

OneRoadMap | CERT-51B202E4

SQL

OneRoadMap | CERT-255DOASO

AI Engineer

OneRoadMap | CERT-BAoD13o6

Data Analyst

OneRoadMap | CERT-oECF6B3C

INTERNSHIP

Aenexz Tech

Data Science & Data Analytics

01/2026 – 04/2026 | Bangalore

Completed a 3-month internship in **Data Science & Data Analytics** at Aenexz Tech Private Limited, where I worked on data analysis, visualization, and machine learning concepts. Gained hands-on experience in Python, data preprocessing, exploratory data analysis, and predictive modeling while demonstrating consistency, innovation, and active participation throughout the internship period.

Titanic Survival Analysis

Machine Learning / Data Analytics

During the Internship, Developed a **Titanic Survival Analysis** project using Python and machine learning techniques to analyze passenger data and predict survival outcomes. The project involved data cleaning, feature engineering, exploratory data analysis (EDA), visualization, and building predictive models to identify the key factors affecting passenger survival.

PROFILE

Motivated ML and Data Science enthusiast with hands-on experience building AI-driven applications in Python. Skilled in end-to-end ML solutions across NLP, computer vision, and audio-visual processing, with expertise in deployment using Streamlit.

SKILLS

Programming :

Python, Java

Web Development :

Streamlit, HTML, CSS.

Databases :

MySQL

AI/ML & Data Science:

Machine Learning, Deep Learning, Pandas, NumPy, Matplotlib, Seaborn

Tools & Others:

Git, Streamlit

PROJECTS

Intelligent Voice and Audio Enhancement

[SonicAI]

Artificial Intelligence & Machine Learning (AI/ML)

- **Objective :** Built an AI-based system for enhancing speech quality using ML and DSP techniques.
- **Technologies used:** Python, Machine Learning, Librosa, PyDub, Digital Signal Processing (DSP), Audio Enhancement Algorithms.

Resume Screening & Matching Application

Artificial Intelligence & Machine Learning (AI/ML)

- **Objective:** Developed a Streamlit-based platform to extract, preprocess, and match resumes with job descriptions using NLP techniques. Enhanced recruitment efficiency with keyword gap analysis and visual insights.
- **Technologies used:** Python, Streamlit, SpaCy, NLTK, Scikit-learn, Pandas.

MarketPulse Analytics

Machine Learning / Data Analytics

Objective: Analyzed AI job market trends and BMW sales data to identify hiring patterns and market insights through exploratory data analysis.

Technologies used: Python, Pandas, NumPy, Matplotlib, Seaborn.
